

Norgas Carriers AS - vessel fixture update

This fixture reflects the ongoing improvement in the demand of our services and the customers' willingness to pay higher rates for such services as it has been seen lately. Effective from October last year IM Skaugen ASA and A.P. Møller - Maersk established a co-operation, Maersk Norgas Gas Carriers (MNGC), to enhance the semi refrigerated gas carrier operations of the two companies by improved service and efficiency towards the customers.
